Fire Support System (FSS) Gun Book

- The Automated Weapon Record Book (WRB) is a unit of functionality of the Howitzer Information Tool (HIT) System from the end user's perspective.
 - The capability required to create, edit and display the Weapon Record Book requirements for the M198 Medium Howitzer, Towed (E0665).
 - The system will allow the user the capability to track the firing and non-firing data, major components, throughout the life of Howitzer.
 - Visibility through hyperlink fields to view MARES (MIMMS / SASSY) information resident in the MERIT system.
 - The tool will provide the ability for the Ordnance Community to maintain their Weapon Record Book data in an automated environment.
